TELL CONGRESS: HANDS OFF OUR RETIREMENT AND HEALTH CARE!

We, the undersigned, urge our members of Congress to oppose replacing Medicare's guaranteed benefits with a voucher. We oppose efforts to cut hard-earned Social Security benefits for current and future retirees. We implore Congress to not revoke health care for millions of Americans by dismantling the Affordable Care Act. These proposed changes are absolutely unacceptable to us and our families. Congress should instead be working to strengthen retirement security and access to health care for all working families and support common sense approaches to preserve vital programs like Social Security and Medicare.
